

Enterprise Cyberconference Series  
Eco-Friendly Treasury Services

**Environmentally and Economically-Friendly Treasury Services: Remote Lockbox Deposit**

Please join Kathy Curtin, CTP, Vice President, BNY Mellon Enterprise Product Manager for an informative session on **Wednesday, May 25, 2011 from 2 p.m. to 3 p.m. ET.** Kathy will review our **Remote Lockbox Deposit** service and provide a case study outlining the potential benefits for your business clients.

Offered as an extension to our private-labeled Wholesale Lockbox service, Remote Lockbox Deposit enables the scanning and transmitting of check and document images directly to your clients' lockboxes at BNY Mellon for deposit and same-day processing. Not only can your business customers receive same-day credit for these payments (that they would otherwise have to deposit locally or ship to the lockbox site), the associated transaction data is imaged and included in their daily accounts receivable file and in the same image archive as their traditional paper lockbox payments. This process can improve the efficiency of their overall accounts receivable workflow, and reduce the time and expense associated with handling these transactions.

This is the first cyberconference of our *Eco-Friendly Treasury Services*' series. This series will highlight services that, by eliminating paper, improving efficiency, and reducing costs, can benefit both your business client and the environment. All of our invitations to these cyberconferences will be sent to you electronically. If there are others in your organization who would benefit from this information please forward this invitation to them.

To participate in this free, 60-minute Cyberconference, click [here](#) to register online or call 1 800 424 3004 (Option 2).
