BNY MELLON
WEALTH MANAGEMENT

BNY MELLON NATIONAL SHORT-TERM MUNICIPAL BOND FUND – CLASS M

Goal/Approach

The fund seeks to maximize current income exempt from federal income tax to the extent consistent with the preservation of capital.

To pursue its goal, the fund normally invests at least 80% of its net assets, plus any borrowings for investment purposes, in municipal bonds that provide income exempt from federal income tax. The fund occasionally, including for temporary defensive purposes, may invest in taxable bonds.

The fund's investments in municipal and taxable bonds must be of investment grade (i.e. Baa/BBB or higher) quality at the time of purchase or, if unrated, deemed of comparable quality by the investment adviser. Generally, the fund's average

effective portfolio maturity and its average effective portfolio duration will be less than three years. The fund may invest in individual municipal and taxable bonds of any maturity or duration.

In calculating average effective portfolio maturity and average effective portfolio duration, the fund may treat a security that can be repurchased by its issuer on an earlier date (known as a "call date") as maturing on the call date rather than on its stated maturity date.

Portfolio Management

The investment adviser for the fund is BNY Mellon Fund Advisers, a division of The Dreyfus Corporation.

John F. Flahive, CFA, serves as the fund's primary portfolio manager, a position he has

held since September 2015. Mr. Flahive has been a portfolio manager at Dreyfus since November 1994. Mr. Flahive is also a senior vice president of The Bank of New York Mellon, which he joined in October 1994.

Certain Risks

The fund is subject generally to interest rate, credit, liquidity, call, and market risks, to varying degrees, all of which are more fully described in the fund's prospectus.

Generally, all other factors being equal, bond prices are inversely related to interest-rate changes and rate increases can cause price declines.

Please refer to the prospectus for a more complete discussion of the fund's main risks.
