Net interest margin (FTE) — Non-GAAP (0) (a) Includes the everage impact of offsetting under enforceable netting ears										

<sup>(</sup>a) Includes the average impact of offsetting under enforceable netting agreements of approximately \$47 billion for 3Q21, \$41 billion for 2Q21, \$41 billion for 4Q20 and \$43 billion for 3Q20. On a Non-GAAP basis, excluding the impact of offsetting, the yield on federal funds sold and securities purchased under resale agreements would have been 0.17% for 3Q21, 0.15% for 2Q21, 0.19% for 1Q21, 0.23% for 4Q20 and 0.26% for 3Q20. On a Non-GAAP basis, excluding the impact of offsetting, the rate on federal funds purchased and securities sold under repurchase agreements would have been 0.02% for 3Q21, (0.04)% for 2Q21, (0.02)% for 1Q21, 0.00% for 4Q20 and 0.04% for 3Q20. We believe providing the rates excluding the impact of netting is useful to investors as it is more reflective of the actual rates earned and paid.

<sup>(</sup>b) In 2Q21, we reclassified the impact of hedging within the categories comprising total investment securities to align the impact of hedging with the securities being hedged and reclassified prior periods to be comparable. The change reduced the income and average rates previously reported for U.S. government obligations and U.S. government agency obligations and increased the income and average rates for Other securities.

<sup>(</sup>c) Average rates were calculated on an FTE basis, at tax rates of approximately 21%.

<sup>(</sup>d) See "Supplemental Information – Explanation of GAAP and Non-GAAP Financial Measures" beginning on page 16 for the reconciliation of this Non-GAAP measure.

#### THE BANK OF NEW YORK MELLON CORPORATION SUPPLEMENTAL INFORMATION – EXPLANATION OF GAAP AND NON-GAAP FINANCIAL MEASURES

BNY Mellon has included in this Financial Supplement certain Non-GAAP financial measures on a tangible basis as a supplement to GAAP information, which exclude goodwill and intangible assets, net of deferred tax liabilities. We believe that the return on tangible common equity – Non-GAAP is additional useful information for investors because it presents a measure of those assets that can generate income, and the tangible book value per common share – Non-GAAP is additional useful information because it presents the level of tangible assets in relation to shares of common stock outstanding.

Net interest revenue, on a fully taxable equivalent ("FTE") basis – Non-GAAP and net interest margin (FTE) – Non-GAAP and other FTE measures include the tax equivalent adjustments on tax-exempt income which allows for the comparison of amounts arising from both taxable and tax-exempt sources and is consistent with industry practice. The adjustment to an FTE basis has no impact on net income.

BNY Mellon has also included the adjusted pre-tax operating margin – Non-GAAP, which is the pre-tax operating margin for the Investment and Wealth Management business, net of distribution and servicing expense that was passed to third parties who distribute or service our managed funds. We believe that this measure is useful when evaluating the performance of the Investment and Wealth Management business relative to industry competitors.

The presentation of the growth rates of investment management and performance fees on a constant currency basis permits investors to assess the significance of changes in foreign currency exchange rates. Growth rates on a constant currency basis were determined by applying the current period foreign currency exchange rates to the prior period revenue. We believe that this presentation, as a supplement to GAAP information, gives investors a clearer picture of the related revenue results without the variability caused by fluctuations in foreign currency exchange rates.

#### Notes:

Certain immaterial reclassifications/revisions have been made to prior periods to place them on a basis comparable with the current period's presentation.

In businesses where average deposits are greater than average loans, average assets include an allocation of investment securities equal to the difference.

Return on common and tangible common equity ratios are annualized.
